

2025 COLLECTION

2025 COLLECTION

NOTES FROM THE FIELD

TABLE OF CONTENTS

02	TECHNICAL FEATURES	110	CUTLERY
08	BLADE STEEL	120	GOLD CLASS
12	BLACK CLASS	122	ACCESSORIES
50	BLUE CLASS	126	S1 + S2 OVERVIEW
84	WATER	128	INDEX
96	HUNT		

What a collection! This entire portfolio serves as a representation of the hard work, determination, and passion of our team in Oregon City, OR. We hope you feel the dedication to our craft through each of the new families and exciting upgrades available for 2025.

As we prepare for what's ahead, our commitment to top-tier quality, performance, and service stands stronger than ever. On behalf of Benchmade, we appreciate your support in pushing us to continually exceed expectations and set the bar for excellence.

Sincerely,
JON DEASIS - PRESIDENT & CEO

EDC

Not obtrusive or uncomfortable in slacks or shorts, just convenient and well fitted to your general needs.

OUTDOOR

From the woods to backpacking or car camping, overlanding or off roading, these versatile cutting tools can be used for many tasks.

SURVIVAL

Things can happen unexpectedly for any adventurer. These knives have been built for the unexpected.

WATER

Water environments can be unpredictable. These knives were designed to withstand hard use and cut with precision. You'll never leave land without one.

HUNT

Knives are a critical component of a successful hunt. These are the most advanced hunting knives ever made.

TACTICAL

Designed for hard, immediate use, these high-strength knives feature robust mechanisms for situations when every second matters.

RESCUE

Built for critical situations. Gloved hands and the need to cut pliable materials are considerations in the design of these knives.

CUTLERY

These knives seamlessly transition from camp to the tailgate to the backyard and the kitchen.

HOW YOU CHOOSE YOUR KNIFE

DEPENDS ON HOW YOU LIVE YOUR LIFE

Metal Matters

BLADE
STYLES

MANUAL OPENING

“Manuals” must be opened 100%, from the closed position to the open position by the user.

ASSISTED OPENING

“Assists” have a spring that encourages the blade into the open position once the user pushes the blade manually beyond a certain point.

AUTOMATIC OPENING

“Autos” have a button or other actuation switch that mechanically fires the blade open without the user directly manipulating the blade.

FIXED BLADE

These knives do not fold and almost always come with a sheath to protect the edge.

BALI-SONG

“Bali” or “butterfly knives” open and close by way of two handles that rotate around the front and back of the blade.

BK

Black coating, no serrations

DLC

Diamond-Like-Carbon coating

FE

Flat Earth coating

GY

Gray coating, no serrations

SBK

Serrations and black coating

OR

Orange Coating

S

Serrations, no coating

NONE

No coating, no serrations

SFE

Serrations and Flat Earth coating

SGY

Serrations and gray coating

SL

Crushed Silver Coating

Trailing Point

The spine curves upward to create an elevated point that’s typically higher than the handle.

Clip-Point

Blade contains a sharp beak, typically forward of the midpoint, as if the spine has been “clipped off.”

Tanto

This shape is easily identified by the angular lines. The knife edge is flat and transitions with a hard break in the angle from the tip to the primary edge.

Wharncliffe

Similar in shape to the sheepsfoot with a spine that ‘rolls’ into the tip earlier. This blade has a completely straight edge.

Opposing Bevel

Design features a non-uniform blade geometry that creates an offset pry-tip, while maintaining a consistent chisel grind on the cutting edge.

Drop-Point

Drops off the spine to the top. Tip height is typically above the center line on the blade.

Reverse Tanto

Defined by the bevel creating an upside-down tanto profile, adding weight forward on the blade.

Spear-Point

Must be symmetrical considering the blade profile. *Traditionally, spear-points are double-sided, but those knives are more specifically referred to as daggers.

Straight Back

This shape features a curved cutting edge with a flat spine creating a keen tip for precision cutting

Scimitar

A slightly curved blade that broadens toward the tip.

Sheepsfoot

The spine of the blade “rolls” into the tip earlier. This blade has a completely straight edge.

HANDLE MATERIALS

Carbon Fiber

A contemporary premium composite of thin strands of carbon tightly woven into various weave patterns, then impregnated with resin that is most commonly clear but can be color-tinted. It offers great looks and is exceptionally strong for its minimal weight.

Grivory®

An amorphous nylon copolymer with exceptional dimensional stability. 50% or greater glass fill.

6AL-4V Titanium

Considered an exotic metal alloy (titanium + 6% aluminum + 4% vanadium) with an excellent strength-to-weight ratio that offers exceptional performance in a knife. Titanium is corrosion-resistant to natural elements as well as many industrial chemicals.

6061-T6 Aluminum

A nonferrous metal originally developed as a premium aircraft grade aluminum, it offers a solid handle form and function at a nominal weight. Most typically color-anodized which creates a hard protective surface finish.

THE BEST MATERIALS

BK
Black

ORG
Orange

WHT
White

SN
Sand

OD
Olive Drab

BLU
Blue

*-1, -2, etc. typically indicate handle material variations

G10

An extremely durable makeup of layers of fiberglass soaked in resin, then highly compressed and baked. Impervious to moisture or liquid and physically stable under a wide range of temperatures. Most commonly black, but is also available in various colors.

Richlite

Used as a lightweight construction material for decades, Richlite is a durable, multi-layer fibrous paper composite that can be dyed in a wide range of colors.

Stabilized Wood

A composite material of layered sheets of natural, dyed wood backfilled with resin. Stabilized wood is much more resistant to environmental hardships than natural wood.

Santoprene®

A thermoplastic elastomer that is molded to specification. It offers excellent flexibility with high tear strength and fatigue resistance. Resistant to many harsh chemicals. These features contribute to improved performance in a range of tough jobs.

BUILT TO AVOID CORROSION

Corrosion resistance is measured by the resistance of a blade to oxidization and chemical attack. This is an important consideration when you're going to be in wet or humid environments and need a blade that can stand up to the elements.

N680 / HRC: 57-59

A special-application steel for when corrosion resistance is the primary requirement. Ideal for salt water applications, the addition of nitrogen to the alloy gives this the best corrosion resistance of any blade steel.

M390 / HRC: 58-61

A super-performance blade steel with exceptional cutting ability, corrosion resistance and wear resistance.

CPM-S45VN / HRC: 60-62

The higher levels of Chromium along with the introduction of Nitrogen in S45VN allow for improved corrosion resistance over CPM-S30V and CPM-S90V, while balancing the excellent performance found in both of those steels.

154CM / HRC: 58-61

A premium-grade steel developed for tough industrial applications. Known best for its all-around qualities, 154CM offers a good balance of corrosion resistance, toughness and edge quality.

BUILT TO AVOID CORROSION

BUILT FOR STRENGTH

Blade strength is the maximum stress withstood before a blade breaks or fails. These are among some of the strongest steels in the industry that can stand up to the demands of hard use applications.

CPM-M4 / HRC: 62-64

A powder-metal, non-stainless, special purpose high-speed steel with excellent strength, wear resistance and toughness.

CPM-CRUWEAR / HRC: 63-65

An air-hardenable non-stainless tool steel that has improved toughness and wear resistance over D2 steel. CPM-CruWear has vanadium to form extremely hard vanadium carbides for edge retention along with and tungsten and molybdenum to increase the working hardness without reducing the toughness.

CPM-MAGNACUT / HRC: 60-62

A new approach to stainless tool steel that eliminates chromium carbides from the microstructure. The result: A combination of properties with similar toughness and edge retention to non-stainless steels like CPM-CruWear and CPM-4V, with the addition of excellent corrosion resistance and strength. (60-62 HRC)

CPM-154 / HRC: 58-61

This powder-metal version of conventional 154CM steel has a much finer microstructure with smaller carbide particles than its counterpart, resulting in improved toughness and strength.

BUILT FOR STRENGTH

BUILT FOR EDGE RETENTION

Edge retention is how long a blade can maintain its sharpened edge. When performing cutting tasks over and over, you need an edge that stays sharp. These steels are among some of the best for edge retention.

CPM-S90V / HRC: 59-61

A true super-steel, S90V offers substantial improvements in corrosion resistance over 440C and wear resistance far beyond that of D2.

CPM-20CV / HRC: 59-61

Excellent edge retention and great corrosion resistance are typically hard to find in one steel; however, they meet here in CPM-20CV.

CPM-S30V / HRC: 58-60

As a blade material CPM-S30V provides a good balance of all performance properties characteristics and offers excellent corrosion resistance with superb edge retention qualities.

D2 / HRC: 60-62

A high-carbon, high-chrome tool steel provides better edge retention than 440C and 154CM; however, it has less toughness and corrosion resistance than either of these alloys.

BUILT FOR EDGE RETENTION

BUILT FOR TOUGHNESS

Blade toughness is the resistance of a blade to fractures and chipping. This is an important consideration for activities such as batoning or other uses that may involve force on the blade to perform cutting tasks. These steels have exceptional toughness.

CPM-3V / HRC: 60-62

A powder-metal tool steel, its high carbon and vanadium paired with low chromium make it exceptionally tough while still being able to maintain a good cutting edge.

DAMASTEEL / HRC: 58-60

With alternating layers of RWL34 and RPMC27, this powder metal 'Damascus' steel doesn't just get by on its looks alone. The interweaving of these two alloys provides great strength and toughness.

CPM-D2 / HRC: 60-62

This powder-metal version of conventional D2 steel has a much finer microstructure with smaller carbide particles than its counterpart, resulting in improved toughness and strength. A great choice for the customer who loves D2 but wants an upgrade in performance.

440C / HRC: 58-60

Originally designed for ball bearings, valves and gears, this high-carbon stainless steel is the staple of the cutlery industry.

BUILT FOR TOUGHNESS

A person wearing a helmet and riding gear is performing a wheelie on a dirt road. The motorcycle is in the center-left of the frame, with its rear wheel lifted. The background features a dense forest of evergreen trees and a large, dark bridge structure on the right side. The entire image has a dark, blue-tinted aesthetic.

**GEAR
THAT GOES
ANYWHERE**

1AM

- DROVE FOR 6 HOURS DOWN A LONG DUSTY ROAD UNTIL THE EDGE OF THE FOREST LOOMED AHEAD. THE LIGHT FROM THE HEADLIGHT GAVE 100 YARDS OF VISIBILITY. BEYOND THAT LAY THE PITCH DARKNESS OF THE NIGHT.

THE BAILOUT®

WHEN YOU'RE GOING THE DISTANCE, YOU NEED A KNIFE THAT WILL DO THE SAME.

Inspired by—and built for—tactical situations, the Bailout® takes ultralight power to its maximum potential. Boasting a diamond-textured, anodized aluminum handle and CPM-M4 blade steel in a tanto profile, this slim pocket tool achieves an optimal strength-to-weight ratio that makes it suitable for hard use and everyday carry in equal measure.

→ Crater Blue anodized 6061-T6 aluminum

→ Flat Earth Cerakote® blade finish

→ Aluminum pommel w/ lanyard slot

→ Hard-use utility to meet your needs in the field

GET IT DONE

There's nothing the Redoubt® can't handle. From the garage to the job site, the Redoubt® is an always-reliable tool built tough to handle every chore you throw at it and light enough for an in-hand comfort until your job is complete. Now available with plain-edge or serrated blades in two colorways, fill your hand with a tool that always gets it done.

THE AUTO OSBORNE

Inspired by overland adventure and stylish daily carry, the 9400BK-03 Auto Osborne is our nod to the rugged folks who enjoy dusty, gritty, challenging trek across natural terrain. Reimagined with fast-deploying push-button automatic action and an integrated spine safety, this latest variant of the 9400 Auto Osborne features a wear and corrosion resistant CPM-MagnaCut reverse tanto blade with DLC Battlewash finish. Clad in lightweight Burnt Copper anodized 6061-T6 aluminum handle scales to tackle the outdoors, the 9400BK-03 Auto Osborne combines rapid response and timeless knife design for hardcore exploration.

→ Burnt Copper 6061-T6 Aluminum handle

→ Push-button auto with integrated safety

→ Wear-and corrosion-resistant CPM-MagnaCut steel

→ Legendary jack-of-all-trades performance

THE SHOOTOUT®

The 5370FE Shootout® double-action out-the-front automatic is the perfect off-hand backup. The molded CF-Elite® handle features a detailed grip texture that provides fast indexing and greater control in high-pressure scenarios. At the same time, the Flat Earth PVD coated CPM-CruWear® blade offers high strength and durability for all cutting tasks. A carbide glass breaker and a reversible pocket clip round out this versatile tool. Made in the USA and fully loaded with our latest tech, the 5370FE Shootout® packs a punch.

Double-action out-the-front automatic. Spine fire release button

Flat Earth PVD blade finish

CPM-CruWear super strong tool steel (63-65HRC)

Reversible tip-down deep-carry pocket clip

THE MINI OSBORNE

Overland adventure requires fine-tuned preparedness to stay ready for the next challenge. The 945BK-03 Mini Osborne is our nod to the rugged folks who enjoy dusty, gritty, challenging treks across natural terrain. The new compact Mini Osborne variant features a wear and corrosion resistant CPM-MagnaCut reverse tanto blade with a DLC Battlewash finish and Burnt Copper Anodized 6061-T6 aluminum handle scales dotted with mean black oxide hardware. Lightweight, versatile, and timeless, the 945BK-03 Mini Osborne is easily pocketable and an effective backup for the truck, the camper, and your day pack.

THE PSK™

For the outdoor enthusiast who prefers to carry a hard-core workhorse folder for camping tasks and survival experiences, the 593BK-01 PSK™ is your Personal Survival Kit in one tough and rugged lightweight bushcrafting tool. Built sturdy with full liners and outfitted with a textured carbon fiber bolster and black G10 handle housing a strong, corrosion resistant CPM-MagnaCut blade. If you like to carry an auto outdoors but are restricted by your region, the 593BK-01 PSK™ is the perfect alternative for efficient and ambidextrous one-hand deployment.

- Corrosion resistant CPM-MagnaCut
- Black Cerakote® finish
- Rapid and reliable AXIS® Assist actuation with integrated spine safety
- Striking choil at the base of the blade for fire starting with a ferro rod

YOUR BEST
CHANCE AT
SURVIVAL

MASTER YOUR CRAFT

Channel your inner-survivalist with the sleek modern bushcraft fixed-blade reimagined as a premium variant to our original 162 designed by Shane Sibert. Built for the trail — or straying off of it — the new 163 and 165 has been elevated with new blade geometry, premium finishes, and handle ergonomics. From fire prep batoning and feather sticking to shelter building and food prep around camp, the Bushcrafter begs you to be outside.

→ Two color options are available in both the full size and mini variants

→ Comes with a belt-carry leather sheath with ferro rod attachment

→ Made from durable all-weather materials

→ Redesigned with updated blade geometry and handle ergonomics

A WORKHORSE
EDC

THE DACIAN™

For the daily carry fan who prefers an all-purpose fixed-blade knife to a folder, the 203 Dacian™ is designed to be your perfectly sized companion for general-purpose utility, outdoor recreation, or EDC. Featuring a blend of a super tough, corrosion resistant CPM-MagnaCut blade steel with a spear point profile and high grind for maximum sliceability. The durable Denim Micarta handle is constructed with deep finger grooves for extreme comfort in multiple grip positions, the 203 Dacian™ includes a Russet Brown molded sheath with a high retention clip for easy access from the belt, pocket, or waistband.

THE FISHCRAFTER™ 9"

When processing the day's catch, we believe in fishing more and sharpening less. Fashioned with a larger 9" trailing point CPM-MagnaCut steel blade with SelectEdge® tech, the Fishcrafter™ excels at cutting medium to large fish where that extra length makes a smooth cut for a clean fillet. Featuring a long, straighter edge for stability in the cut and upswept tip for aiding in deboning, the 9" Fishcrafter™ knife's durable Santoprene® handle has a finger guard with jimping to prevent slipping during push-cuts.

- CPM-MagnaCut steel with SelectEdge®
→ White logo lasermark prevents corrosion
→ Santoprene handle provides solid grip
→ 7" and 9" blade options

THE INTERSECT™

A fisherman's minimalist, tough-as-nails cutting tool, the Intersect™ is a versatile fixed blade built for convenient and quick access when seconds matter. An EDC for the adventurer, the Intersect™ dons a 2.75" drop-point blade forged of CPM-MagnaCut steel. This compact knife is ideal for finer tasks like cutting tangled line. The Intersect™ features a Santoprene handle and spine jimping for a secure grip and pinch cuts when wet. Purposefully designed with a quick mount sheath that attaches to pockets, belts, backpacks, waders, and beyond.

BEST FOR
GENERAL
CUTTING TASKS

→ CPM-MagnaCut steel

→ White logo lasermark prevents corrosion

→ Santoprene handle provides solid grip

→ Long spine jimping for increased blade control

THE MINI ADIRA™

The mini variant of our waterman's favorite folder, the versatile Mini Adira™ is a heavy-use EDC built for tasks in wet environments. Featuring a 3.21" drop point blade made of CPM-MagnaCut stainless steel, this pocket-ready fisherman's folder uses an AXIS® Lock mechanism with stainless steel springs for corrosion resistance, plus high-vis colored details and a useful orange lanyard for easy access. From prepping bait on a hook to slicing lines for a new rig, the Mini Adira™'s got your back on and off the water.

→ Paracord lanyard + bead

→ White logo lasermark prevents corrosion

→ Grivory® handle with texture for a lightweight feel

→ Higher corrosion resistant 17-7PH omega spring

BEST FOR HARD USE, BAIT PREP, EDC AND GENERAL CUTTING TASKS

THE MINI TAGGEDOUT®

Whether you're packing out your harvest or packing your everyday carry essentials, the new ultralight 15533OR-01 Mini Taggedout® shaves even more ounces off your kit than its full-size counterpart while retaining all its premium features. Wielding a super tough, corrosion resistant CPM-MagnaCut stainless steel blade with SelectEdge® tech and a hi-vis orange Cerakote® finish, the 15533OR-01 keeps its featherweight figure thanks to the carbon fiber handle scales. With a thumb hole, black oxide hardware, and a mini deep carry pocket clip paired with an orange anodized backspacer, the 15533OR-01 performs just as nimbly as an EDC off-site.

→ CPM-MagnaCut (60-62 HRC) super stainless steel

→ Carbon Fiber handle

→ Featuring SelectEdge® technology

→ Clip-point blade style

→ A HUNTER'S EDC

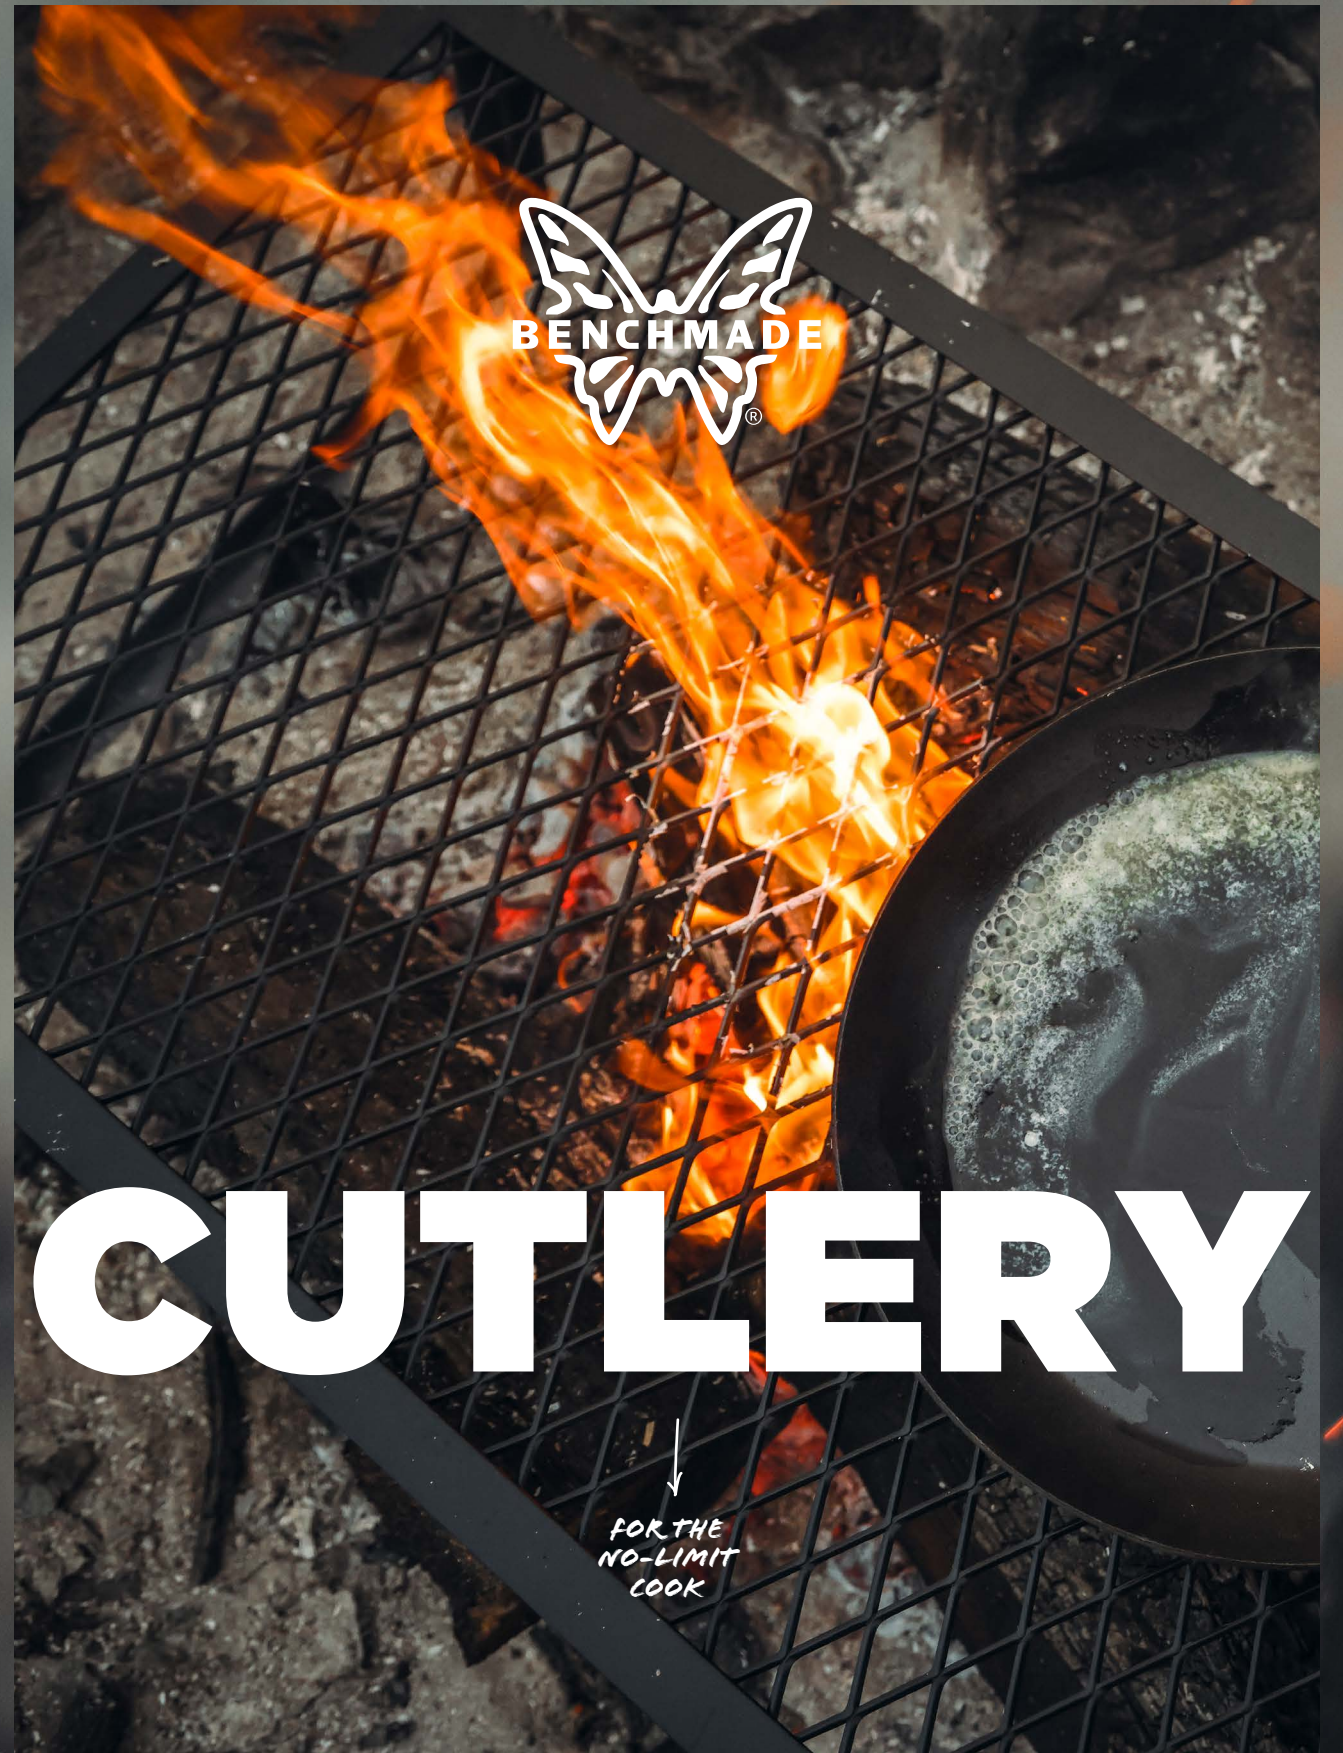

THE DO-IT-ALL KNIFE

PERFECT FOR THE
CAMPSITE OR KITCHEN

BUILT WITH
SELECTEDGE®
TECHNOLOGY

LOCATION
- MAUPIN, OREGON

- COOKING OVER THE FIRE, A RITE OF
PASSAGE FOR ANYONE THAT LIVES
OUTDOORS. THE CHAR, THE FLAMES, AND
THE SUNSETTING. THIS IS WHAT THE
STATION KNIFE WAS BUILT FOR.

CUTLERY

FOR THE
NO-LIMIT
COOK

LOCATION

- ARIZONA DESERT, JUST
OUTSIDE OF FLAGSTAFF

- UNDER THE ARIZONA SKY, THE 3 PIECE SET IS READY FOR
CAMPFIRE COOKING. THIS SET IS PERFECT FOR EVERY STEP OF
MEAL PREP, FROM SLICING FRESH INGREDIENTS TO SERVING
UP YOUR FINISHED DISH. IT'S THE ULTIMATE TOOL FOR
TURNING OUTDOOR MEALS INTO MEMORABLE EXPERIENCES.

THE TABLE
KNIFE

- COWBOY CUTS STEAK. MAKIN' DO WITH WHAT YOU GOT,
BUT A BETTER MEAL YOU'VE NEVER HAD. YOU DON'T NEED A
LOT TO MAKE SOMETHING AMAZING.
THE TABLE KNIFE - ALWAYS WITH ME, ALWAYS READY.

BEST IN CLASS

GOLD CLASS

In the waning moments of an Arctic sunset, a vivid purple haze is all that remains as the sky fades to black. Inspired by this mysterious spectacle, we crafted a unique unlimited limited EDC for the hardcore collector, the Gold Class 585BK-251 UNLTD/LTD Mini Barrage®. Designed with fast-deploying Axis Lock Assist for boosted actuation, the 585BK-251 UNLTD/LTD Mini Barrage® features premium Purple Haze FatCarbon handle scales, Abyss PVD-coated hardware, and a Black DLC Battlewash finished CPM-S90V stainless steel drop-point

- ✦ PRICE - \$180.00

DESIGNER COLLABORATIONS

Benchmade's collaborations with custom designers has created the most innovative and functional designs in the the industry. These skilled artisans and craftsmen poured their passion into these designs and agonized over every detail. By collaborating with a selection of world-class custom designers, we were able to tap into innovative locking mechanisms, modern materials, and custom blending and finishing techniques.

MEL PARDUE

The most senior design team member, Mel has been grinding sparks, making knives and creating a following for 25-plus years. His style has a class and simplicity all its own. The Pardue collaborations offer great utility to the every day knife user while at the same time presenting an upscale distinction. Less is definitely more with Mel's designs.

SHANE SIBERT

Since 1994, Shane Sibert's goal has been to design and create unique knives that evoke pride of ownership while at the same time perform tasks and challenges with exceptional ease. A lifelong avid backpacker, Shane draws inspiration from hiking throughout the Pacific Northwest's vast wilderness. He's an occasional practitioner of martial arts and enjoys scuba diving in Oregon's chilly waters.

GREG THOMPSON

Greg used an extensive background in mixed martial arts to create the Special Operations Combatives Program (SOCP), a designated program for U.S. Army Special Operations Forces. With over 15 years of experience training Special Operations soldiers, Greg currently works as the Director of Training for the XVIII Airborne Corps at Fort Bragg, NC

BILL MCHENRY & JASON WILLIAMS

Talented designers and developers of several innovations in the knife-making world including the Benchmade AXIS® mechanism.

WARREN OSBORNE

Bridging the gap between custom and production knives, Warren created some of Benchmade's most iconic and loved models like the 940 series, Barrage, Rift and Contego. Warren set very high standards for himself and we are proud that his work has become ingrained in Benchmade's DNA.
